

Teach project planning — with the tool, not with slides about it.

Your students build a real, presentation-grade project plan in their first session — in the browser, no installation, no credit card. A class is **one link**: students sign themselves up, and access ends automatically with the course.

01 · SET UP

One code per class

Tell us the course name, class size and end date — you get a class code and its link, e.g.
gantt360.com/redeem?code=YOUR-CLASS

02 · ONBOARDING

Students onboard themselves

Click the link, sign up, done — the code redeems automatically. Full professional features (PowerPoint export, share links, AI coach) for the duration of the course. No account admin for you.

03 · TEACH

Cohort view for instructors

Who joined, who was last active, who submitted? Submissions are plain share links — deliberately not an LMS, no extra system.

WHAT THE LICENSE INCLUDES

- ✓ **The full Business feature set** for every student — drillable phases, editable .pptx export, interactive share links, AI coach
The same tools consultancies use to run their steering committees.
- ✓ **Ready-made teaching materials** — three classroom-tested exercise units (timeline → milestones & dependencies → phases & export), an instructor guide and a student cheat sheet (currently German; English on request)
- ✓ **Class codes with seat limits** — any number of classes in parallel, each with its own duration and instructor
- ✓ **Automatic course end** — accounts fall back to the free plan; students keep their own charts (portfolio effect)
- ✓ **No student payment data** — one invoice to the institution, nothing else

LICENSE MODEL

Pilot class

€0

One class, one semester — materials & setup included. No strings attached.

Per class

€149 / semester

Up to 30 seats · dedicated instructor access with cohort view · materials included

Site license

€490 / year

Unlimited classes & instructors at one site · priority support

Invoiced to the institution (no student payments). Prices excl. VAT; special terms for public education providers on request.

“I teach project management myself — GANTT360° is the tool I built for my own courses after 25 years of SAP rollouts.”

Robert Aksan, founder — PM trainer & program lead, Vienna

EU-hosted — data stays in Europe (AWS Ireland)

GDPR-compliant · DPA on request

Your charts **never train AI models**

Browser-based — Mac too, no IT ticket

Access **ends automatically** with the course

Set up a pilot class — free, in 15 minutes.

Send us the course name, class size and start date — we handle the rest.
